INDEX TO VOLUME LXIII 1995

Subjects

Accounting issues
- implications of 1993 tax act for real estate investors, 350–357
- relative worth of property, 117–119
- financial views, 243–246, 486–488

Agglomeration economies
- retail trends, 425–428
- use of in determining business enterprise value of shopping malls, 33–40

Apartment properties
- reserves for replacement in, 69–80

Appraisal (*see also valuation*)
- appraisal by deductive reasoning, 363–367
- appraisal in China, 102–110
- appraisal heuristics versus economic theory, 11–26
- appraisal methods and regulatory takings, 331–349
- appraisal in Russia, 111–116
- appraisal: science or art, 165–171
- cash equivalency and closing costs in, 41–46
- cost approach in residential appraisal, 182–185
- discrimination in, 87–90, 465–468
- exceptions to appraisal regulations, 310–318
- introduction to Internet, 469–481
- market analysis in, 27–32
- meeting market change challenge, 238–242
- survey of clients, 213–219
- transmitting appraisals electronically, 436–439
- use of artificial intelligence systems in appraisal, 429–435
- use of logic and rhetoric in appraisals, 160–164
- value of *The Appraisal Journal*, 358–362

Appraisal clients
- appraisers and the Americans with Disabilities Act, 298–309
- appraiser attitudes toward industry changes, 291–297
- discrimination in appraisal process, 87–90, 465–468
- exceptions to appraisal regulations, 310–318
- factual basis of appraiser's testimony, 172–176
- highest and best user, 275–280
- legal liability of appraisers, 147–154
- make cost approach optional in residential appraising, 182–185
- make expertise known to clients, 155–159
- marketing for appraisers, 403–409
- real estate situations in which appraisers are needed, 119–120
- survey of clients, 213–219
- synthesizing marketing and management of appraisal company, 410–417
- team approach to property tax appeals, 325–330
- use of logic and rhetoric to communicate to clients, 160–164

Appraisal firms
- appraisers, FIRREA, and bank compliance, 220–229
- appraiser attitudes toward industry changes, 291–297
- discrimination in appraisal process, 87–90, 465–468
- factual basis of testimony, 172–176
- how to communicate to clients, 155–159
- how to use new URAR form, 47–52, 230–231
- legal liability of appraisers, 147–154
- logic and rhetoric in appraisal reporting, 160–164
- meeting market change challenge, 238–242
- successful marketing techniques, 403–409
- survey of clients, 213–219
- synthesizing marketing and management of appraisal company, 410–417
- value engineering and full-service appraisal, 418–424

Appraisal review
- reviewing reports estimating vacancy rates, 209–212
- use of appraisal review to increase objectivity of appraisal process, 165–171

Artificial intelligence
- and the future of appraising, 429–435
- transmitting reports electronically, 436–439

Benchmark price
- use of in China to determine minimum land prices, 102–110

Business enterprise value
- the debate continues, 33–40
- entrepreneurial profit and marketwide external obsolescence, 53–59

Capitalization
- deriving *IRR* for REO, 202–203
- deriving *IRR* sets from transactions, 195–201
- requiem for Ellwood, 284–290
- use of in determining replacement reserves in apartments, 69–80

Cash equivalency adjustments
- and closing costs in residential appraisals, 41–46

China
- land-use rights reforms and appraisal in, 102–110

Communication skills
- appraisers and the Americans with Disabilities Act, 298–309
- appraiser–attorney team approach, 325–330
- communicating expertise to clients, 155–159
- the corner adjustment, 204–208
- discrimination in appraisal process, 87–90, 465–468
- factual basis of an appraiser's testimony, 172–176
- marketing for appraisers, 403–409
- use of logic and rhetoric to communicate appraisal, 160–164
- using new URAR form, 47–52, 230–231

Comparable sales adjustments
- comparing properties on finished lot basis, 235–237
- paired-sales analysis for corners, 204–208
- use of to enhance scientific appraisals, 165–171
- use of in sales comparison approach, 177–181

Condemnation actions
- appraisal methods and regulatory takings, 331–349
- introduction to eminent domain, 91–101
- recent Supreme Court decisions on, 453–456

Contaminated property
- new URAR and environmental hazards, 47–52

Cost approach
- changes regarding new URAR form, 230–231
- use of in determining marketwide external obsolescence, 53–59
- use of in residential appraising, 182–185

Deductive reasoning
- appraisal as science or art, 165–171
- logic and rhetoric in appraisal reporting, 160–164
- use of to compare sales, 363–367

Discounted cash flow analysis
- deriving *IRR* for REO, 202–203
- ensuring consistency in vacancy rate estimation, 209–212
- use of in determining replacement reserves in apartments, 69–80
- use of as opposed to Ellwood method, 284–290
- using *IRR* to develop discounted cash flow, 195–201

Easements
- appraisal methods and regulatory takings, 331–349
- introduction to eminent domain issues, 91–10
- trends in dedications and exactions, 453–456

Electronic transmission of reports
- applicable standard, 436–439
- use of Internet for appraisers, 469–481

Ellwood method
- alternatives to, 284–290

Eminent domain
- appraisal methods and regulatory takings, 331–349
- introduction to, 91–101
- recent Supreme Court decisions on dedications and exactions, ?–?

Entrepreneurial profit
- debate on business enterprise value, 33–40

Electronic transmission of reports
- applicable standard, 436–439
- use of Internet for appraisers, 469–481

Ellwood method
- alternatives to, 284–290

Eminent domain
- appraisal methods and regulatory takings, 331–349
- introduction to, 91–101
- recent Supreme Court decisions on dedications and exactions, ?–?

Entrepreneurial profit
- debate on business enterprise value, 33–40

and marketwide external obsolescence, 53–59, 375–378

Environmental issues
new URAR and environmental hazards, 47–52

Ethics
appraisal as science or art, 165–171
appraiser attitudes toward industry changes, 291–297
discrimination in appraisal process, 87–90, 465–468
guidelines for expert witnesses, 457–464

External obsolescence
and entrepreneurial profit, 53–59, 375–378

Financial issues
business enterprise value, 33–40
derivatives and their implications, 243–246
deriving *IRR* for REO, 202–203
financial views—spring, 243–246
financial views—summer, 486–488

Finished lot
definition of for comparison purposes, 235–237

Forecasting methods
statistical implications of most probable price, 81–86
using GIS to map values, 440–444, 445–452
using transaction costs to estimate residency discounts, 232–234

Geographic information systems
a GIS approach to mapping real estate values, 445–452
using GIS to enhance MLS, 440–444

Heuristic decision rules
in analyzing highest and best use, 11–26

Highest and best use
appraisal heuristics versus economic theory, 11–26
deciding highest and best user, 275–280
of a vacant parcel, 281–283

Institutional appraisal
deriving *IRR* for REO, 202–203
financial views—spring, 243–246
financial views—summer, 486–488
investment issues, 243–246
news from NCREIF—spring, 247–249,
news from NCREIF—fall, 482–485

International appraisal
land-use rights reform and appraising in China, 102–110
risk and reward of appraising in Russia and Lithuania, 111–116

Internet
transmitting reports electronically, 436–439
overview for appraisers, 469–481

Legal issues
appraisers and ADA, 298–309
discrimination in appraising, 87–90, 465–468
factual basis of appraiser's testimony, 172–176
guidelines for witnesses, 457–464
introduction to eminent domain, 91–101
legal liability of real estate appraisers, 147–154
legal situations in which appraisers are needed, 119–120
property tax appeals, 325–330
trends in dedications and exactions, 453–456
use of statistical analysis to support court testimony, 81–86

Lender issues
appraiser attitudes toward industry changes, 291–297
discrimination in appraising, 87–90, 465–468
FIRREA, appraisal, and bank compliance, 220–229
making cost approach optional in residential appraising, 182–185
survey of clients, 213–219

Market analysis
defining business enterprise value, 33–40
in appraisal process, 27–32
meeting market change challenge, 238–242

Market value
Highest and best use of vacant parcel, 281–283
Highest and best user, 275–280

Medical office buildings
appraisal of, 186–194

Multiple regression analysis
limitations of, 81–86, 429–435
pros and cons of in appraising, 128–129
use of in analyzing FIRREA, appraisal reports, and bank compliance, 220–229

Nursing home appraisals
USPAP Competency Provision and appraisal of retirement facilities, 319–324

Office buildings
appraisal of medical, 186–194

Paired-sales analysis
corner adjustments, 204–208

Professional development
appraisal: science or art, 165–171
appraiser attitudes toward industry changes, 291–297
appraiser's dilemma, 375
exceptions to appraisal regulations beyond de minimis, 310–318
guidelines for expert witness testimony, 457–464
legal situations in which appraisers are needed, 119–120
limitations of use of commercially generated sale data for residential appraising, 177–181
meeting market change challenge, 238–242
public relations and marketing techniques for appraisers, 155–159, 403–409
retail trends and their implications for appraiser assignments, 425–428
synthesizing marketing and management of appraisal company, 410–417
transmitting reports electronically, 436–439
use of artificial intelligence systems in appraisal, 429–435
use of GIS to enhance valuation process, 440–444, 445–452
use of Internet for appraisers, 469–481
use of logic and rhetoric to enhance appraisal reports, 160–164
value engineering as alternative career for appraisers, 418–424

Real estate investment trusts
creation of value through securitization procedure, 117–118
financial views, 243–246, 486–488

Regulation
appraisal methods and regulatory takings, 331–349
appraisers and ADA, 298–309
exceptions to appraisal regulations, 310–318
FIRREA, appraisal reports, and bank compliance, 220–229
implications of 1993 tax act, 350–357
recent Supreme Court decisions on dedications and exactions, 453–456
Statement on appraisal standards concerning electronic transmission of appraisal reports, 436–439
USPAP Competency Provision and appraisal of health care facilities, 319–324

Rental rates
estimation of vacancy rates, 209–212
of medical office buildings, 186–194
for retail centers in market analysis, 27–32
use of transaction costs to adjust potential gross income for residency discounts, 232–234

Replacement reserves
in apartment properties, 69–80

Residential issues
cash equivalency and closing costs in residential appraisals, 41–46
changes to URAR form, 47–52, 230–231
cost approach in residential appraising, 181–85
estimating residency discounts using transaction costs, 232–234
limitations of commercially generated comparable sales for residential appraisal, 177–181
meeting market change challenge, 238–242
survey of clients, 213–219

Retail centers
business enterprise value in shopping malls, 33–40
market analysis of, 27–32
retail trends, 425–428

Sales comparison approach
changes regarding on new URAR form, 230–231
comparing properties on finished lot basis, 235–237
comparing sales by deductive reasoning, 363–367
corner adjustments, 204–208
pros and cons of commercially generated comparable sales, 177–181

Standards of appraisal practice
appraiser attitudes toward industry changes, 291–297
exceptions to appraisal regulations, 310–318
Statement on transmitting appraisal reports electronically, 436–439
USPAP Competency Provision and appraisal of healthcare facilities, 319–324

State certification and licensing
appraiser attitudes toward industry changes, 291–297
exceptions to appraisal regulations, 310–318

Statistical analysis
limitations of, 11–26, 81–86
deriving *IRR* sets from market transactions, 195–201
use in Ellwood method, 284–290
use in estimating vacancy rates, 209–212

Tax issues
impact of tax assessment districts on development of finished lot, 235–237
implications of 1993 tax act, 350–357
property tax appeals, 325–330

Transaction cost:
cash equivalency and closing costs in residential appraisals, 41–46
deriving *IRR* for REO, 202–203
in adjustments for shopping malls, 33–40
use of to adjust potential gross income for residency discounts, 232–234

Vacant parcel
highest and best use of, 281–283

Valuation
by deductive reasoning, 363–367
of apartment properties, 69–80
of business enterprise value, 33–40
of finished lot, 235–237
of healthcare/retirement centers, 319–324
of medical office buildings, 186–194
of property in China, 102–110
of property in Russia, 111–116
of regulatory takings, 331–349
of residency discounts, 232–234
of retail centers, 425–428
of vacant parcel, 281–283

Value engineering
as alternative career for appraisers, 418–424
